## FERTILIZER CE

LACK ADJUSTER, pH AND SOIL SALINE

Manufacturer:

Composition:

Formulation:

Presentation:

PRODUCTOS AJF SL

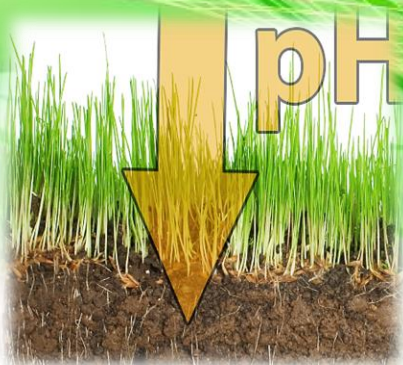

Elemental sulfur (S) 99.5%

Equivalent to 249% w / w of sulfur trioxide (SO<sub>3</sub>)

Dusting powder (DP)

Container: 25 kg

AQUASUL is a preparation of elemental sulfur (S), to correct the lack of sulfur in the plant and the alkalinity of the soil with an optimum result. It has been developed by the Productos AJF I + D + i department, based on 45 years of industry experience, and, after several years of study and research, we have developed novel technology "PTF".

### AQUASUL AS A pH ADJUSTER AND SALINE SOILS

AQUASUL due to its micronized presentation (unlike other adjusters), accelerates the biological performance facilitating the correction of soil pH, releasing sodium and assimilation of nitrogen and phosphorus. Its micronized presentation allows its application both powders (DP) and fertigation.

CORRECTING ALKALINE SOILS					* Dose expressed in kg / ha
SOIL pH	ALL AREA		LOCATED IN BANDS		
	SANDY	CLAYEY	SANDY	CLAYEY	
7.5	450-600	900-1100	225-280	340-550	
8.0	1100-1700	1700-2200	340-550	650-900	
8.5	1700-2200	> 2200	650-900	> 900	
9.0	2200-3400	---	> 900	---	

To correct the first 15 cm of soil	SODIC SOIL CORRECTION									
Na meq / 100 g soil:	one	two	3	4	5	6	7	8	9	10
Dose (Tm / ha)	0.36	0.72	1.08	1.44	1.80	2.20	2.50	2.90	3.20	3.60

### AQUASUL AS LACK ADJUSTER

AQUASUL corrects the deficiency of sulfur in the plant, taking part in the formation of proteins, vitamins (A and B) and enzymes, vegetation and improving the fruit set flower, and activating the chlorophyll function.

It is advisable to make several annual applications at a dose of 25 to 30 kg / ha.
