CUPRISUL[®]

FERTILIZER CE

LACK ADJUSTER

Composition: Sulfur (S) 98% elemental
Sulfur trioxide (SO₃) 245%
Copper (Cu) total 2%

Dusting powder (DP)

CUPRISUL is a preparation of elemental sulfur (S) and copper (Cu), to correct the lack of sulfur and copper on the plant with an optimum result. It has been developed by the Productos AJF I + D + i department, based on 45 years of industry experience, and, after several years of study and research, we have developed the new "PTF" technology, getting a higher fineness and homogeneity in this product, achieving a greater efficiency.

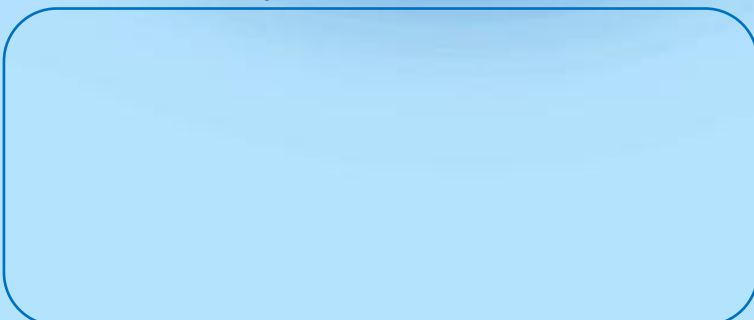

What is it for?

CUPRISUL is a lack adjuster of sulfur and copper, for all plant species.

RECOMMENDED DOSE		
CROPS	DOSE	S.D.
ALL PLANT SPECIES <small>Except: strawberries, cane fruit, other small fruits and berries, roots and tubers, bulbs and fruits cucurbits (except tomato and eggplant), sweet corn, asparagus, sugar beet and sugar cane.</small>	0.4-0.5 Kg / 100m²	15 days
